

## **LINUS BIOGRAPHY**

Linus Benedict Torvalds, is a software engineer who is known for the create and maintain the kernel Linux develop, based on Minix (a free operative system).

Linus was born in Helsinki, Finland, the December 28 of 1969. His first computer was one of the first microcomputers Conmodore in 1980, so his first code line was done in BASIC language. In 1988 was admitted on Helsinki University, and studied Computer Science. At the age of 21 he began a personal project which later was the first version of Linux able to execute BASH and GCC compiler.

And in 2005 he created Git, a version control software, he thought on the efficiency and reliance of the maintain.

The legacy he left behind is Linux operative system, just the 2% Linux kernel was written by Linus Torvalds, that's because there has been a lot of anonymous contributions to this project. Linux is open source but is probably the securest operative system actually.
